

Just My Socks

Service Details

Registration Date

Sunday, February 2nd, 2020

Product/Service

Just My Socks - Just My Socks 1000

First Payment Amount

\$5.88 USD

Recurring Amount

\$27.38 USD

Next Due Date

Tuesday, June 2nd, 2020

Billing Cycle

Quarterly

Status

Active

Monthly data transfer used

14.707 GB used out of 1000 GB

Data transfer reset day

Counter resets monthly on day 2 (Los Angeles time zone)

Supported Protocols

TCP + UDP [help]

ShadowSocks Encryption

Depends on server, see server details

ShadowSocks Port

18039

ShadowSocks Password

E3UttCckj4

ShadowSocks Server IP

```
c23s1.jamjams.net | aes-256-gcm
c23s2.jamjams.net | aes-256-gcm
c23s3.jamjams.net | obfs=tls, aes-256-gcm, no udp
c23s4.jamjams.net | obfs=tls, aes-256-gcm, no udp
c23s5.jamjams.net | aes-256-cfb
```

Which Address should I use?

NOTE: To address government blocking issues, we change IPs from time to time. We have switched over to DNS to make your life easier – you will not have to manually re-enter IP in your application each time we change IPs. The domain names shown above will always point to correct IP addresses.

You can use any of the domain names listed above instead of IP.

If your application does not support specifying domain name as Shadowsocks server IP, you can use actual IP addresses shown below. Note that if any of these IPs get blocked, we will replace them, and you will need to update your application configuration. In order to avoid this, we recommend using domain names specified above.

```
c23s1.jamjams.net | aes-256-gcm -> 107.182.181.25  
c23s2.jamjams.net | aes-256-gcm -> 144.34.216.110  
c23s3.jamjams.net | obfs=tls, aes-256-gcm, no udp -> 199.168.137.253  
c23s4.jamjams.net | obfs=tls, aes-256-gcm, no udp -> 97.64.37.61  
c23s5.jamjams.net | aes-256-cfb -> 104.225.157.248
```
