Quarterly
Status
Active
Monthly data transfer used
1.71 GB used out of 1000 GB
Data transfer reset day
Counter resets monthly on day 2 (Los Angeles time zone)

Supported Protocols
TCP + UDP [help]
ShadowSocks Encryption
Depends on server, see server details
ShadowSocks Port
28619
ShadowSocks Password
E3UttCckj4
ShadowSocks Server IP

```
c23s1.jamjams.net | aes-256-gcm
c23s2.jamjams.net | aes-256-gcm
c23s3.jamjams.net | obfs=tls, aes-256-gcm, no udp
c23s4.jamjams.net | obfs=tls, aes-256-gcm, no udp
c23s5.jamjams.net | aes-256-cfb
```

Which Address should I use?

NOTE: To address government blocking issues, we change IPs from time to time. We have switched over to DNS to make your life easier – you will not have to manually re-enter IP in your application each time we change IPs. The domain names shown above will always point to correct IP addresses.

You can use any of the domain names listed above instead of IP.

If your application does not support specifying domain name as Shadowsocks server IP, you can use actual IP addresses shown below. Note that if any of these IPs get blocked, we will replace them, and you will need to update your application configuration. In order to avoid this, we recommend using domain names specified above.

```
c23s1.jamjams.net | aes-256-gcm -> 64.64.239.156
c23s2.jamjams.net | aes-256-gcm -> 216.24.178.177
c23s3.jamjams.net | obfs=tls, aes-256-gcm, no udp -> 199.168.137.253
c23s4.jamjams.net | obfs=tls, aes-256-gcm, no udp -> 97.64.37.61
c23s5.jamjams.net | aes-256-cfb -> 104.225.157.231
```

URIs and QR codes — jamjams.net domain name

Server 1 (via jamjams.net domain name)

```
ss://YWVzLTI1Ni1nY206RTNVdHRDY2tqNEBjMjNzMS5qYW1qYW1zLm5ldDoyODYxOQ#JMS-134314@c23s1.jamjams.net:28619
```

Server 2 (via jamjams.net domain name)

```
